LOGIN / SIGNUP

FINANCE TRACKER

Navigate to "Sign Up," complete fields like name, email, password. Click sign-up. Log in using credentials to securely access your profile/dashboard for a seamless user experience.

The illustration shows a person with dark hair in a ponytail, wearing a green shirt and dark pants, standing next to a large screen. The screen displays a 'Sign Up' form with three input fields: 'Full Name', 'Email', and 'Password'. Below the fields is a green 'Sign Up' button. At the bottom of the form, it says 'Already have an account? [Login](#)'. The entire scene is set against a dark teal background with a large white circle framing the form and illustration. A speech bubble icon is in the top left, and a white circle is in the bottom left.

Analysis & Tips

Your spending breakdown relative to y
income:

- Needs: 0.3%
- Wants: 9.3%
- Unnecessary Wants: 0.0%
- Savings: 0.0%

Your spending on needs is within a he
range.

Your discretionary spending is under c

Your savings are below 20%. Aim to inc
your savings gradually for financial se

Tips:

- Cook meals at home to reduce food expenses.
- Cancel unused subscriptions.
- Automate savings deposits.
- Review bills and negotiate better rat

ANALYSIS & TIPS

FINANCE TRACKER

The "Analysis and Tips" section offers insights to reduce expenses, boost savings, ensure balanced budgeting, and empower users to achieve financial goals confidently based on their transaction history and practical suggestions.

TECHNOLOGY USED

HTML builds the app's foundational structure, organizing content and elements, while vanilla CSS styles the application, adding colors, layouts, and responsiveness to create a visually engaging and functional design.

HTML / CSS

JavaScript is utilized to handle various tasks like form validation, user interactions, and event handling, while efficiently managing data through APIs, local storage, and real-time updates for seamless functionality.

Javascript

Local Storage is used to store data in a user's browser persistently, allowing quick access to information like user preferences or session details without needing server-side requests. Chart.js to create pie chart.

Local Storage / Js Libraries
